

White,

1671.

A New

ALMANACK

For the year of our Lord God,
1671.

Being the year from the worlds
Creation, 5634.

And the 3^d. from Bissextile, or Leap-year.
Calculated and properly referred
to the Meridian of *Todington* in *Bedford-*
shire, where the north pole is elevated
above the horizon 52. degrees and 8 mi-
nutes, so that it may serve for all parts
of *England*, without any sensible error.

By William White.

*Laudate eum Sol & Luna, Laudate eum omnes
stelle lucis, Psalm 148. 3.*

LONDON,

Printed by Robert White, for the
Company of Stationers. 1671.

A brief and necessary Computation of YEARS.

Since the Conquest of England by Duke William
 Since the Invention of Guns
 Since the Art of Printing was Invented

January hath xxxj. dayes.

The old year's past, the new doth now begin,
 Put off the old man, abandon deadly sin:
 Such as determine in their sins to dwell,
 There is no hope but they run post to hell.

September hath xxv. dayes.

Ripe fruits, but sound; in measure eat,
 Now spice you may eat with your meat.
 Now Dog dayes gone, bathe, purge and bleed,
 And Physick take, if that you need.

November hath xxx. dayes.

Now Earth is cloath'd in horrid woods,
All flourishing flowers are faded :
It well resembles state of man,
When life by death's invaded.

12	9	36	27
13	10	24	28
14	11	12	29
15	12	0	30

From the change to the full, the Moon comes to the South, after-noon.
From the full to the change, the Moon comes to the South before-noon.

lamme to the left hand, right over against it towards the right hand, I find 4. and 48. shewing me her coming to South to be at 4. a clock, and 48 min: after-noon. And when it was 5. days old, as it was the day before, being the first day of February, her coming to the South was just at 4. a clock after-noon.

The Use of the Table.

The age of the moon being found in the Kalender (that is) how many dayes is past from the time of her change, Therewith enter this table, & having found it in the first column to the left hand, if it be before the full moon; or to the right hand, if it be after the full moon: you shall have in the middle column, her coming to the South, before or after, as is noted in the foot of the Table.

As for Example.

The 21. Day of February, the Moon is 6 days old, therewith entering the table in the first co-

A very plain and easie table to find the
true interest due upon any Sum of money
from five shillings to an hundred pounds
for a year or under, after the rate
of six pounds in the
Hundred.

The Moveable Faires.

From Christmas till June every Wednesday at Northaller-
ton.

The three Mondays after Twelfth day at Hinckley in Leice-
stershire.

The Tuesday after Twelfth day at Melton Mowbray and an horse
fair at Salisbury.

The Thursday after Twelfth day at Banbury, Littleworth, and
every Thursday after for three weeks.

Friday after Twelfth day at Litchfield.

On Shrove Monday Newcastle under Line, at Barkham-
sted.

On Ash Wednesday at Abington Candain in Gloucester, Cle-
ster Dunstable Eaton by Windsor Exeter Fockingham Lick-
field Royton Tamworth Tunbridge.

The first Monday in Lent at Chertsey in Surrey Chichester
Winchester.

A Prognostication.

The first Tuesday in Lent at Bedford.

The fourth Munday in Lent, at Odiham Garrison-Walden
Standford.

Friday and Saturday before the first Sunday in Lent at
Hartford.

On Munday before the Annuntiation at Denby Kendal
Wisbitch.

The first Munday in Lent at Grantham Helxom in Sussex
Salisbury Sudbury.

Wednesday before Palm-sunday at Draiton.

On Thursday before Palm-sunday at Landisfel.

Palm-sunday eve at Alesbury Leicester Newport Pomfract
Bikpton Wisbitch.

On Palm-munday at Billingsworth Kendal Landauren
Worcester.

Wednesday before Easter at Kaerlin Languil. Mound.
Thursday at Kettering Sudminster.

The Explanation & Use of the former Map & Table.

First for the Map: The figures in each shire of the map are to shew you the names of every County, & the Letters in the same are for such uses, as I will shew hereunder.

You must understand that London is in Middlesex, which County of Middlesex hath the figures of 22 in it, & the little black speck, or spot therein signifieth London. Now if you would readily find the name of any Shire therein, and how many miles the middle of the said County (in a straight line) is from London, & what point of the Compass it lyeth from the said City; resort then to the Table of Shires on the other side, and it will resolve you.

As for example, Barkshire it hath the figure of 1 in the map, & so it hath likewise in the Table; wherets shewed that the middle or heart of that Shire is 40 miles from London in a straight line, & it lyeth full west from the City and looking for ward toward the right-hand, it sheweth it hath no City, 11 Markets Towns, 2 Castles, 140 Parishes, 3 Rivers, & 13 Parks. Again, Buckinghamshire hath the figure of 3 in the Map, & so it hath before it in the Table, the heart or middle of which shire is from London 35 miles, & lyeth North-west & by west from the said City, it hath no City, 11 Markets Towns, no Castle, 185 Parishes, 2 Rivers, and 15 Parks; and so of the rest.

The use of the Letters in the Map is this, S Scotland, signifieth part of Scotland, I part of Ireland, F part of France, M the Isle of Man, W the Isle of Wight, L the Lizard point, H Holy-head, the * the Irish Sea, B the British or English Sea, G the German Sea, Ba Barwick, D Dover, N Newcastle, C the points of the Compass, S the Scale of Miles, by which you may measure the distance of any place, for every black degree is five miles, so is every white.

The 39 Shires from Barkshire to Yorkshire are the English Shires, & the other 13 from Anglesey, to Radnorshire are Welsh.

It may be something further in Miles to the middle of each shire by reason of the crookedness of the Highwayses, Rivers, and Vallies, but what is here set down is meant in a straight line from London, as is said

Rules

A Prognostication.

Rules of Mensuration

A fingers breadth is four barley cornes in thicknes; and an Inch three Barley cornes in length: A handes breadth four fingers: A span is three handes breadth: A foot is four handes breadth: A Geometrical Pace is like the foot: an English Search is 101. foot $\frac{1}{2}$ A furlong is a hundred and twenty like Paces, or six hundred twenty and like the foot: An English furlong is six hundred and threescore foot, or a hundred thirty two paces: A League is a thousand and five hundred paces: An Italian Mile is a thousand paces, or eight furlongs: A Common German Mile is three two furlongs: In English Mile is eight furlongs. An Arse is sixty Searches in length, and four in breadth.

How to judge what Weather will follow, by the rising and setting of the Sunne.

The Sun rising bright & clear, signifieth a pleasant day: If he rise fiery red, it promiserh rain: If at his rising he be thinly overcast with a cloud, it bethokeneth foul weather: If the sun by the the clouds be hid from him into the West, it signifieth fair weather: If at his rising there appear a circle about him & betheneth away equally, it betokeneth fair weather. If he setteth red, it signifieth fair weather: If at his setting he be of divers colours, or clouds like water, it betokeneth rain. If at the rising of the Sun, his beams be red, or long, or encompassed with red clouds, it signifieth great winds: If at his rising there appear much mist, or if it raineth in the evening, it betokeneth foul weather to follow. If the Sun be spotted either green, pale or black, or gathered to a point, it signifieth rain. The Sun setting clear without any cloud, signifieth a fair night to ensue. If the
circle

circle, or circles about the Sun be clear, & of no continuance, look for fair weather: If there be many circles, it signifieth winds: the rounder they are, the more vehement winds. If the circles are here & there broken, & are thick & black, look for cold wind or snow: or if he settle behind a great black cloud, rain follows.

How Weather is foreknown by the Moon.

If the Moon in the third day of her change, or 3 dayes before her full, or in the midst of the quarter, be found of pure light, nothing compassing her, the ends direct up, she prometh fair weather: but bent to red colour, she sheweth winds. The Moon pale, or somewhat black or thick, threatneth rain. When the Moon is five dayes old, mark the tips of her horns, if they be blunt, it signifieth rain: if sharp-pointed & pitching upwards, great winds. If in the fourth day after her change, she have a red circle about her, it signifieth winds and rain.

Of the judgment of Weather by the Stars.

If the Stars appear of much light, and seem to be of more bignesse and blazing then ordinary, it betokeneth great windes and moisture in that part where they seem so; and in Winter, great frosts. When dim Stars appear with long fiery tayles, it threatneth winds, and great drought: the more in number, the greater will be the effect. Also when Starres seeme to shoot or fall, it signifieth great winds in that place: If they seem to shoot in divers places, it signifieth divers windes: If in all places, windes, thunder, lightning, and most tempestuous weather.

How to judge of the weather by the Clouds.

Black clouds flying from the east, signifieth Rain at night: if from the West, rain the next day: if they doe looke and appear to settle upon the tops of hills, it is a signe of cold weather, if they

be full charged, and appear white like tomers, hail is
at hand: if white clouds appear in winter, the 21
thies days together at sun rising, it is a sign of cold
and snow; but black clouds signify rain. A red sky
in the evening, and a gray morning is a sign of a fair
day. Spits falling in the morning, in evening or har-
vest, also mists over ponds or waters in the morning
show rain. If the clouds fly swiftly in the ayre, it sig-
nifies rain from that part of the heavens, especially
from the north or south. If thick white clouds ga-
thered together in many places like flocks, or heaps
of wool, appear in many places, it is a sign of rain:
but if thick dark clouds towards the north or west
near the earth, presently rain, and if the hills a little
above the earth, foul weather is over. If mists de-
scend from the hills, and settle in the valleys, it is a
sign of fair hot weather next day, or if white mists
rise from the waters in the evening.

How to judge of the weather by the Rain-bow.

The natural signification of the Rain-bow, is to
show rain either past or to come. The Rain-bow
appearing when it is fair, is a sign of foul weather,
when it is foul if it appear, it is a sign of fair weather;
the greener it appears, the more rain, the redder the
more wind; if before noon then the rain is spent; if
the rain-bow appear about one or two in the after-
noon, then rain is near. A rain-bow in the morning
is a sign of wet (unless there be brought in the air):
if it appear in the evening, it is a sign of fair weather
(unless the air abound with moisture.) A rain-bow
at night opposite to the moon, is a sign of much small
rain and wind to follow. A rain-bow after long rain
is a sign of fair weather presently; if two rain-bows
appear together, it is a sign of rain within one or two
days after.

6. sh. 9. d.	0 5 12	0 8 9 0 1 1	vi. oun. ix. 1	xii. 1. 4. sh. xii.

The proportion of the pound Avoir-du-pois to the pound Troy, is as 60 to 73, so that 60 pounds Avoir-du-pois are equal to 73 pound Troy. The proportion of the ounce Troy to the ounce Avoir-du-pois, is as 73 to 80, so that 73 ounces Troy, are equal to 80 ounces Avoir-du-pois. Therefore the pound Avoir-du-pois is greater than the pound Troy: and the ounce Troy is greater than the ounce Avoir-du-pois.

Wheat at 5 shillings the Bushell or Stryke, the Town Bakers penny white, is (by Troy) 7 ounces, 7 penny weight: by Avoir-du-pois 8 ounces: And the Country Bakers penny white (by Troy) 7 ounces 13 penny weight: by Avoir-du-pois 8 ounces and one quarter. If the Baker want one ounce in 36 ounces of this Assize, he shall suffer the Pillorie: without any fine or admonition, 51 Hen. 3.

To

White. 1671:

To find the time of the Sun-rising, or setting, and consequently the length of the Day and Night throughout the whole YEAR.

For the ready finding of the Sun's rising and setting, I have added the subsequent Table, the use whereof is thus: In the head of this Table (consisting of fourteen columns) are placed the names of the twelve Moneths, viz. January, February, &c. July, August, &c. and in the first & eighth Column thereof, are placed the daies of the Moneth, from 1. to 31. Moreover, in the head of the Table, under the names of the Moneths, is *Ris. S. Set.* which signifieth Sun-rising, and Sun-setting, and below that is *H. M. H.* which signifieth, Hours, Minutes, Hours.

For example.

I would know the Sun-rising and setting January 10. first, I find January in the head of the Table, and in the first Column on the left hand I find the tenth day, and right against the tenth day under January I find 7 50. 5. which shews me, that the Sun riseth at seven a clock, and fifty minutes past in the Morning, and setteth at fifty minutes before five at night; and so for the rest.

Now if you would know the length of the day and night, do but double the hour and minute of the Sun's setting, and the sum is the length of the day; and if you double the hours and minutes of Sun-rising, you shall have the hour of the night.

Example.

The tenth day of January I would know the length of the day and night: I find (by the precedent directions) the Sun riseth at 7. hours 50. min. which doubled is 15. hours 40. min. for the length of the night: and 4. hours 10. min. the Sun-setting being doubled, makes 8. hours 20. min. for the length of that day.

White. 1671.

The use of the Table following.

IN the first place go to the Dominical Letter of the year, wherein you desire to know any moveable Feast: then finde the Golden Number for the same year, which is adjoyning to that letter: thirdly, in a straight line right against that number, you shall finde the moveable Feasts: As in example in the year 1645. the Dominical Letter is E, and the Golden Number 12, then next to 12, by the Letter E, followeth in a straight line 7 weeks and 4 dayes, to wit, (as the Title over the top sheweth) from Christmas to Shrove-Sunday, then February the 16, for Shrove-Sunday. Thirdly, April the 6. for Easter day. Fourthly, May the 11. Rogation-Sunday. Fifthly, May 25, Whitfunday: and lastly, Novemb. 30, for Advent Sunday.

A Table

A Table to finde the moveable Feasts.

Domin. Letter.	Golden Number.	From Christmas to Shrove-tuesday.	Shrove- tuesday.	Easter Day.	Rogat Sunday.	Whit- Sunday.	Ad- v. fund.

A Table

A Table to know the Dominical Letter, the Circle of the Sun, the Golden number, and the Epact for every year.

year of God.	Circle of Sun.	Dominical letter.	Gold. numb.	Epact.
1644	1	GF	11	1
1645	2	E	12	12
1646	3	D	13	23
1647	4	C	14	4
1648	5	BA	15	15
1649	6	GF	16	26
1650	7	F	17	7
1651	8	E	18	18
1652	9	DC	19	29
1653	10	B	1	11
1654	11	A	2	22
1655	12	G	3	3
1656	13	FE	4	14
1657	14	D	5	25
1658	15	C	6	6
1659	16	B	7	17
1660	17	AG	8	28
1661	18	F	9	9
1662	19	E	10	20
1663	20	D	11	1
1664	21	CB	12	12
1665	22	A	13	23
1666	23	G	14	4
1667	24	F	15	15
1668	25	ED	16	26
1669	26	C	17	7
1670	27	B	18	18
1671	28	A	19	29

For example, in the year 1671 the circle of the Sun answering thereunto is 28, the Sundays letter A. the Golden number 19. and the Epact 29 And the next year 1672. this circle beginneth again, for the circle of the Sun is 1. the Sundays Letter GF. the golden number 11 and the Epact 1. So that the circle of the Sun and the Dominical Letter begin after 28. years, the circle of the Moon called the golden number, and the Epact begin every 19 year, reckoning forwards in the circle for years that are to come, & backwards for yeares that are past.
